# iConnect.
my life, my style

My Life, My Style
iConnect offers a complete lifestyle accessory with advanced functionality, within a stylish design. The solution provides residential security, safety, connectivity and control, and is backward-compatible with Electronics Line 3000's wireless product range, enabling a wide variety of configuration options and upgrades.

Security: A full-range of intelligent wireless detectors provides comprehensive interior and perimeter protection. Innovative detectors incorporate advanced RF and signal processing technologies while integrated pet-immunity features differentiate pets from humans, ensuring high reliability and immunity to false alarms.

Safety: A variety of specialized wireless detectors monitor environmental and safety hazards such as smoke, water and gas leaks, as well as temperature monitoring. For enhanced personal safety, a medical emergency button automatically opens a two-way voice channel with remote users, monitoring stations or medical services in cases of personal distress.

Connectivity and Control: Users enjoy constant connectivity in and out of the house. Built-in microphone and speakerphone for two-way conversation enable communicating with designated users at a single touch of a button. Various activation devices offer advanced onsite system control while home automation features enable control of home appliances such as heating, lights, sprinklers and more.

It's all
in your hands

Electronics Line 3000
Electronics Line 3000 is a world leading developer, manufacturer and provider of advanced security, safety, connectivity and control solutions, combined with remote management applications, for the residential and small commercial markets.

The Company was established in 1982, evolving throughout the years from a traditional manufacturer of security systems to an industry market leader, committed to developing advanced, next generation solutions. Technologies used in the Company's next-generation solutions provide value-added services such as: security monitoring, hazard detection, remote management of home and office appliances, video look-in and more. All these are provided using multiple advanced communications technologies including PSTN, GSM, Ethernet and GPRS.

The Company's solutions are suitable for mass market channels, such as service providers, monitoring companies, property developers and distributors, who are looking to rapidly expand their business into the profitable area of residential security and control.

The Company operates through its global network of partners in Europe, U.S.A, Latin America and Asia, with over 2.5 million control systems and 15 million devices installed worldwide. The Company's state-of-the-art fully automated manufacturing facilities ensure mass production of high quality products.

With 25 years of proven experience and a list of hundreds of satisfied partners, Electronics Line 3000 is world renowned as a competent and trustworthy business partner, committed to offering customized solutions and market expertise, as well as sales, installation and technical support, enabling our partners to successfully launch and operate value-added services, making this product offering a reality.

Electronics Line 3000 is publicly traded on the Frankfurt Prime Standard (trading symbol; ELN) and is headquartered in Israel with additional offices in the U.K. and U.S.A.

Everything is under control

Wireless Security

Be secure

EL-2745 Motion Detector
Dual element PIR motion detector with low current microprocessor and adaptive pulse and temperature compensation, a mounting bracket and an accessible battery compartment.

EL-2650XL Directional Curtain Detector
Quad element PIR directional curtain detector for perimeter protection. Narrow beam curtain allows free movement within protected premises.

EL-2607 Vibration Detector
Detects low amplitude vibrations around vulnerable access points for early detection of break-in attempts.

EL-2626AC Outdoor Siren and Strobe
Supervised two-way wireless siren and strobe, AC powered with battery back-up, available with red, amber or blue flash lens 106dB.

EL-2645/ PI Motion Detector
Microprocessor signal analysis for reduced false alarms, with optional 45kg/100lb pet immunity.

EL-2606 Glassbreak Detector
Acoustic glassbreak detector with superior detection performance.

EL-2602 Universal Transmitter
Suitable for connecting a variety of peripherals to the control system.

EL-2601 Magnetic Switch
Door and window intruder detection.

EL-2652SR Semi-External Pet Immune Detector
5m semi-external short range dual PIR detector, with pet immunity of up to 10kg/22lb.

EL-2623 Indoor Siren
One-way wireless siren 110dB DC powered.

Wireless Safety

Be safe

EL-2661 Water Leak Detector
Provides early warning of water leaks for use in basements or near air conditioners and sinks.

EL-2603 Smoke Detector
Photoelectronic smoke detector, provides early warning of the presence of smoke.

EL-2662 Gas Detector
Detects leaks of household heating or cooking gas including methane, propane and butane.

EL-2611 Medical Emergency Button
Water resistant, wireless panic button with pendant/keychain option.

EL-2663 Low Temperature Detector
Low temperature detection (under 5°C) for pipe burst prevention.

EL-2603EN Smoke Detector
EN-54-7 approved photoelectric smoke detector.

EL-2664 Carbon Monoxide Detector
Detects and warns of carbon monoxide presence.

Connectivity and Control

Be connected and in control

EL-2724 Wireless Keypad
Full/Part/Perimeter Arm and Disarm with home automation of up to 16 X10 devices. Clear icons for system status indication, temperature, SOS, alerts and more. Automatic user codes synchronization. Memo recording options and multilingual voice notifications. Proximity smartkey activation (will be available in 2009).

EL-2714 Wireless Multi-function Keyfob
Full/Part/Perimeter Arm and Disarm, home automation and SOS.

EL-2635 Wireless Repeater
Extends the range between the control system and wireless detectors, eliminating problematic reception areas.

X10 Home Automation Unit
Supports a variety of home automation options for utilities and appliances: lights, heating, washers, sprinklers and more.

Two-Way Communication Chanel
Speaker-phone can be opened from the control system or automatically in cases of emergency, providing 24/7 communication connectivity to the premises.

Wired & Wireless IP Cameras
The solution supports video look-in capabilities into the home using a variety of IP cameras.

EL-2640 Wireless Remote Control
Full/Part/Perimeter Arm and Disarm, with 16 home automation devices control.

Wired External Interphone
Two-way microphone and speaker unit, optional for expanding the system's built-in interphone, enabling two way communication and alarm verification.
